

Kunal Patke

Vice President – Engineering

Kunal heads the Engineering function including architecture, development and delivery. He has over two decades of experience in leading teams involved in developing products and frameworks in diverse technologies such as Java, .Net, SQL server and Oracle.

In the past, he has held several Engineering management positions both in startups as well as larger organizations including CMC and HCL America Inc. He was one of the primary architects in building an innovative SOA based EAI framework for integrating diverse enterprise applications for Softplus inc. which was later acquired by US Interactive Ltd. Having worked with both product and services based software companies, Kunal strongly believes in providing simple business solutions for seemingly complex Engineering problems.

Kunal holds a Computer Engineering degree from VJTI, Mumbai.
