

Smart Messaging Platform for Collaboration and Advance Workflow

Smart Messages

The image shows three examples of smart messages in a chat interface:

- Message 1:** "Please share your sales details for today. Total : 10,000". A callout circle highlights the "14 Replies" and "6" message count, with an arrow pointing to the text "Can aggregate responses".
- Message 2:** "Which of these items are the best seller this season?". A table lists items with thumbs-up counts: Accessories (1), Bags (0), Stationary (0), Shoes (1). A callout circle highlights the table, with an arrow pointing to the text "Can render and handle themselves".
- Message 3:** "Will Germany win the World Cup this year?". A callout circle highlights the thumbs-up/down buttons and the count "18", with an arrow pointing to the text "Can enable interactive elements".

Embed SDK

Bot SDK

- Can use default Teamchat app
- Can embed in your site/app
- Can reskin the app
- Can read/write messages just like humans
- Can setup computational logic
- Enables automated workflow
